**TwistDock USB HUB**

powered and integrated.\*

**TwistDock CableSet**

HDMI and powercable for PS3 slim.\*

## **ALWAYS READY FOR ACTION**

What's more annoying than having to stop halfway through a game because your controller's battery has died? That will be a thing of the past thanks to the TwistDock which ensures your controllers are always ready for use; it even charges them when your games console is off. An ingenious twist system allows you to easily slot two controllers onto the back of the TwistDock.

Thanks to the unique twist system, the controllers are easy to grab and always charged. No more losing controllers down the back of the sofa.

## **PRIDE OF PLACE**

The PlayStation games console is an integral feature of many homes. But as with many devices, the PlayStation comes with an unsightly tangle of cables. The TwistDock allows you to neatly conceal those cables whilst putting the games console on a pedestal.

\*USB HUB and CableSet sold separately
